

## **Amelec in the Power Generation Sector - Did you know?**

Eleven potential sites have been announced for a new generation of Nuclear power stations in the U.K.

The Department of Energy & Climate Change has stated that nuclear power is now part of the low carbon future for Britain, and also has the potential to offer thousands of jobs to the UK.

The list of possible sites, each now out to public comment, includes:

Dungeness in Kent , Sizewell in Suffolk , Hartlepool in Cleveland , Heysham in Lancashire , Wylfa Peninsula in Anglesey , Oldbury in Gloucestershire , Hinkley Point in Somerset , Bradwell in Essex , Sellafield, Braystones & Kirksanton in Cumbria.

The draft list of sites which are judged most potentially suitable will then be released later this year for public consultation.
